(EB).....Great Britain.

(EG).....Europe.

Specifications

Audio

No. of channels:	2 (left and right, stereo)
Frequency response:	2 – 20,000 Hz, ± 1 dB
Output voltage:	2 V (at 0 dB)
Dynamic range:	94 dB
S/N:	100 dB
Harmonic distortion:	0.004 % (1 kHz, 0 dB)
Total harmonic distortion:	0.005 % (1 kHz, 0 dB)
Wow and flutter:	Below measurable limit
DA converter:	MASH (1 bit)
Output impedance:	Approximate 1 k Ω
Load impedance:	More than 10 k Ω
Headphone output level:	15 mW max. 32 Ω (adjustable)

Pickup

Wavelength:	780 nm
Laser Power:	No hazardous radiation is emitted

General

Power supply:	AC 230 – 240 V, 50 Hz
Power consumption:	9 W
Dimensions (W $\times$ H $\times$ D):	430 $\times$ 92 $\times$ 290 mm
Mass:	3.1 kg

Notes: Specifications are subject to change without notice.
Mass and dimensions are approximate.

Note on CD-R and CD-RW

This unit can play CD-DA format audio CD-R and CD-RW that have been finalized* upon completion of recording. It may not be able to play some CD-R or CD-RW due to the condition of the recording.

* Finalizing is a process that enables CD-R/CD-RW players to play audio CD-R and CD-RW.

WARNING

This service information is designed for experienced repair technicians only and is not designed for use by the general public. It does not contain warnings or cautions to advise non-technical individuals of potential dangers in attempting to service a product. Products powered by electricity should be serviced or repaired only by experienced professional technicians. Any attempt to service or repair the product or products dealt with in this service information by anyone else could result in serious injury or death.

3 Handling Precautions for Traverse Deck

The laser diode in the traverse deck (optical pickup) may break down due to potential difference caused by static electricity of clothes or human body.

So be careful of electrostatic breakdown during repair of the traverse deck (optical pickup).

3.1. Handling of traverse deck (optical pickup)

1. Do not subject the traverse deck (optical pickup) to static electricity as it is extremely sensitive to electrical shock.
2. To prevent the breakdown of the laser diode, an anti-static shorting pin is inserted into the flexible board (FFC board). When removing or connecting the shorting pin, finish the job in as short time as possible. Refer to Fig. 3-1.
3. Take care not to apply excessive stress to the flexible board (FFC board).
4. Do not turn the variable resistor (laser power adjustment). It has already been adjusted.

Fig. 3-1.

3.2. Grounding for electrostatic breakdown prevention

3.2.1. Human body grounding

Use the anti-static wrist strap to discharge the static electricity from your body. Refer to Fig. 3-2.

Fig. 3-2.

3.2.2. Work table grounding

Put a conductive material (sheet) or steel sheet on the area where the traverse deck (optical pickup) is placed, and ground the sheet. Refer to Fig. 3-3.

Fig. 3-3.

Caution:

The static electricity of your clothes will not be grounded through the wrist strap.

So take care not to let your clothes touch the traverse deck (optical pickup).

4 Precaution of Laser Diode

CAUTION:

THIS PRODUCT UTILIZES A LASER.

USE OF CONTROLS OR ADJUSTMENTS OR PERFORMANCE OF PROCEDURES OTHER THAN THOSE SPECIFIED HEREIN MAY RESULT IN HAZARDOUS RADIATION EXPOSURE.

CAUTION: This product utilizes a laser diode with the unit turned "on", invisible laser radiation is emitted from the pickup lens.

Wavelength: 780 nm

Maximum output radiation power from pickup: 100 μ W/VDE

Laser radiation from the pickup unit is safety level, but be sure the followings:

1. Do not disassemble the pickup unit, since radiation from exposed laser diode is dangerous.
2. Do not adjust the variable resistor on the pickup unit. It was already adjusted.
3. Do not look at the focus lens using optical instruments.
4. Recommend not to look at pickup lens for a long time.

ACHTUNG: Dieses Produkt enthält eine Lasereinheit. Im eingeschalteten Zustand wird unsichtbare Laserstrahlung von der Lasereinheit abgestrahlt.

Wellenlänge: 780 nm

Maximale Strahlungsleistung der Lasereinheit: 100 μ W/VDE

Die Strahlung an der Lasereinheit ist ungefährlich, wenn folgende Punkte beachtet werden:

1. Die Lasereinheit nicht zerlegen, da die Strahlung an der freigelegten Lasereinheit gefährlich ist.
2. Den werksseitig justierten Einstellregler der Lasereinheit nicht verstellen.
3. Nicht mit optischen Instrumenten in die Fokussierlinse blicken.
4. Nicht über längere Zeit in die Fokussierlinse blicken.

DANGER	INVISIBLE LASER RADIATION WHEN OPEN. AVOID DIRECT EXPOSURE TO BEAM.
ADVARSEL	USYNLIG LASERSTRÅLING VED ÅBNING. UNNGÅ UDSTTELSE FOR STRÅLING.
VARO!	AVATTAESSA JA SUOJALUKITUS OHTETTAESSA OLET ALTIINA NÄKYMÄTÖN LASERSÄTELYLLE. ÄLÄ KATSO SÄTEESEEN.
VARNING	OSYNLIG LASERSTRÅLNING NÄR DENNA DEL ÄR ÖPPNAD OCH SPÄRREN ÄR URKOPPLAD. BETRÄKTA EJ STRÅLEN.
ADVARSEL	USYNLIG LASERSTRÅLING NÄR DEKSEL ÅPNES OG SIKKERHEDSLÅS BRYTES. UNNGÅ EKSPONERING FOR STRÅLEN.
VORSICHT	UNSICHTBARE LASERSTRAHLUNG, WENN ABDECKUNG GEÖFFNET. NICHT DEM STRAHL AUSSETZEN.

5 Caution for AC Mains Lead

(For United Kingdom)

("EB" area code model only)

For your safety, please read the following text carefully.

This appliance is supplied with a moulded three pin mains plug for your safety and convenience.

A 5-ampere fuse is fitted in this plug.

Should the fuse need to be replaced please ensure that the replacement fuse has a rating of 5-ampere and that it is approved by ASTA or BSI to BS1362.

Check for the ASTA mark  or the BSI mark  on the body of the fuse.

If the plug contains a removable fuse cover you must ensure that it is refitted when the fuse is replaced.

If you lose the fuse cover the plug must not be used until a replacement cover is obtained.

A replacement fuse cover can be purchased from your local dealer.

CAUTION!

IF THE FITTED MOULDED PLUG IS UNSUITABLE FOR THE SOCKET OUTLET IN YOUR HOME THEN THE FUSE SHOULD BE REMOVED AND THE PLUG CUT OFF AND DISPOSED OF SAFELY.

THERE IS A DANGER OF SEVERE ELECTRICAL SHOCK IF THE CUT OFF PLUG IS INSERTED INTO ANY 13-AMPERE SOCKET.

If a new plug is to be fitted please observe the wiring code as shown below.

If in any doubt please consult a qualified electrician.

IMPORTANT

The wires in this mains lead are coloured in accordance with the following code:

Blue: Neutral, Brown: Live.

As these colours may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:

The wire which is coloured Blue must be connected to the terminal which is marked with the letter N or coloured Black or Blue.

The wire which is coloured Brown must be connected to the terminal which is marked with the letter L or coloured Brown or Red.

WARNING: DO NOT CONNECT EITHER WIRE TO THE EARTH TERMINAL WHICH IS MARKED WITH THE LETTER E, BY THE EARTH SYMBOL  OR COLOURED GREEN OR GREEN/YELLOW.

THIS PLUG IS NOT WATERPROOF—KEEP DRY.

Before use

Remove the connector cover.

How to replace the fuse

The location of the fuse differ according to the type of AC mains plug (figures A and B). Confirm the AC mains plug fitted and follow the instructions below.

Illustrations may differ from actual AC mains plug.

1. Open the fuse cover with a screwdriver.

Figure A

Figure B

2. Replace the fuse and close or attach the fuse cover.

Figure A

Figure B

6 Operation Checks and Component Replacement Procedures

- This section describes procedures for checking the operation of the major printed circuit boards and replacing the main components.
- For reassembly after operation checks or replacement, reverse the respective procedures. Special reassembly procedures are described only when required.

6.1. Checking for the main P.C.B.

- (Step 5)**
Release the 2 claws, and then remove the rear panel.

- Check the main P.C.B. as shown below.

6.2. Checking for the CD servo P.C.B.

- Follow the **(Step 1)** - **(Step 3)** of item 6.1.

- (Step 1)**
Rotate the traverse gear (B) in direction of arrow, and then open the disc tray.

(Bottom side)

(Step 3)
Release the 2 claws,
and then remove the
tray ornament.

**(Step 4)**

Push the disc tray.

**(Step 5)****a** × 4**(Step 6)**

Remove the loading unit.

• Check the CD servo P.C.B. as shown below.

(Step 7)

Raise the loading unit.

6.3. Checking for the FL P.C.B.

• Follow the **(Step 1)** - **(Step 3)** of item 6.1.

(Step 2)

Release the 2 claws, and then remove the front panel ass'y.

• Check the FL P.C.B. as shown below.

6.4. Replacement for the traverse deck ass'y, drive gear and cam gear

• Follow the **(Step 1)** - **(Step 3)** of item 6.1.

• Follow the **(Step 1)** - **(Step 4)** of item 6.2.

(Step 1)**a** × 4**(Step 2)**

Remove the connector.

(Step 3)

Pull out the FFC from connector.

(Step 4)

Remove the loading unit.

NOTE:
When the traverse base ass'y is up, remove the clamber ass'y after lift up the magnet holder.

(Step 6)
Remove the disc tray in the direction of arrow.

(Step 7)
Release the 2 claws, and then pull out the traverse base ass'y.

(Step 8)
Remove the traverse base ass'y.

(Step 9)
Release the 2 claws, and then draw the drive gear.

(Step 10)
Pull out the drive gear.

Installation for traverse base ass'y, cam gear, drive gear, disc tray and clamber ass'y

(Step 1)
 Rotate the traverse gear (B), and then move the optical pickup in the direction of arrow.

(Step 4)
 Put the traverse base ass'y pin into the groove of cam gear, and at the same time, put the boss of cam gear into the traverse lever. (Geared naturally)

(Step 5)
 Put the cam gear into the shaft of mechanism chassis, and put the floating rubber of the traverse base ass'y into pin of mechanism chassis.

NOTE:
 Be careful not to latch the lock spring.

(Step 9)
Put the hole of drive gear and the hole of mechanism chassis together, and then push the drive gear in.

(Step 10)
Install the disc tray.
(When replacing the disc tray, make sure the dented line is at position as shown below.)

(Step 11)
Insert the clamber ass'y from the upper part, and install the claw like getting over.

6.5. Replacement for the optical pickup

- Follow the (Step 1) - (Step 3) of item 6.1.
- Follow the (Step 1) - (Step 4) of item 6.2.
- Follow the (Step 1) - (Step 8) of item 6.4.

Caution:
Insert a short pin into the traverse unit FFC board.
(Refer to "Handling Precautions for Traverse Deck".)

(Step 5)
Rotate the traverse gear (B), and then move the optical pickup to backward fully.

NOTE:
Do not touch the lens of the optical pickup.

6.6. Replacement for the traverse gear (A) and traverse gear (B)

- Follow the **(Step 1)** - **(Step 3)** of item 6.1.
- Follow the **(Step 1)** - **(Step 4)** of item 6.2.
- Follow the **(Step 1)** - **(Step 6)** of item 6.4.

(Step 1)
Rotate the traverse gear (B), and then move the optical pickup to backward fully.

NOTE:
Do not use traverse gear (B) remove once. Be sure to exchange it to new one.

7 Self-Diagnostic Function

The self-diagnostic feature automatically diagnoses the unit's mechanism and provides error information display. It includes

self-diagnostic functions for the servo system and mechanism control switches.

7.1. Servo system self-diagnosis

1. With the test disc (SZZP1054C) loaded, turn off the unit.
2. While pressing and holding the Stop, Pause and Play button, turn on the unit again. Refer to Fig. 7-1. (The self-diagnostic function is activated.)
3. The display will show an error code, if any. Refer to Table 7-1.
4. Press the Play button to play the test disc. Refer to Fig. 7-1.
5. The display shows servo system status. Refer to Fig. 7-2. and Table 7-2.
6. Turn off the unit to exit the self-diagnostic function.

Fig. 7-1.

Table 7-1.

FL error code display	Symptom	Probable cause	Signal to check		Normal voltage and waveform values	
			Signal name	Location	PLAY	STOP
E00	Normal	-----	-----	-----	-----	-----
E01	Focus and tracking offset adjustments has not been completed in the specified time period.	1. IC702's clock input X1 IN, IC702's power supply (V_{DD}) or its reset (/RST) is invalid. 2. Any signal MDATA, MCLK, MLD or SENSE to/from IC601 are invalid.	MDATA	IC702-pin 8	 PLAY $T \approx 13.3\text{ms}$ 3.2V 0V	0 V
			MCLK	IC702-pin 7	 PLAY $T \approx 13.3\text{ms}$ 3.2V 0V	3.3 V

7.2. Mechanism control switches self-diagnosis

1. Turn on the unit.
2. Press the Disc tray open/close button to open the disc tray, and load the test disc (SZZP1054C). Refer to Fig. 7-3.
3. Hold down the Stop button for more than 2 seconds, and then press the F.skip/search button for more than 2 seconds while continuing to hold down the Stop button. Refer to Fig. 7-3. (The symbol "C" is displayed on the display. It indicates the self-diagnostic function is activated.)
4. Press the Stop button. Refer to Fig. 7-3. The display will show an error code, if any. Refer to Table 7-3.
5. If more than one error exists, the display will sequentially show the respective error codes each time the Stop button is pressed.
6. Turn off the unit to exit the self-diagnostic function.

Fig. 7-3.

Table 7-3.

Error code	Symptom	Possible cause
F15	Interval before CD starts playing is too long.	Rest detect switch (S701) is defective.
H15	Disc tray closes immediately after it is opened.	Disc tray open/close detect switch (S790) is defective.
H16	Disc tray opens immediately after it is closed.	
F26	The display shows error code F26 after the unit is turned on. CD does not play.	Communication error between CD servo IC and CPU.

Note:

Error code F26 will be displayed before the self-diagnostic function is activated if an error exists.

8 Schematic Diagram Notes

- This schematic diagram may be modified at any time with the development of new technology.

- Indicated voltage values are the standard values for the unit measured by the DC electronic circuit tester (high-impedance) with the chassis taken as standard. Therefore, there may exist some errors in the voltage values, depending on the internal impedance of the DC circuit tester.

No mark : CD stop
() : CD play [1 kHz, L+R, 0 dB]

- Important safety notice:

Components identified by  mark have special characteristics important for safety.

Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used.

When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.

- The supply part number is described alone in the replacement parts list.

• Caution!

IC and LSI are sensitive to static electricity.

Secondary trouble can be prevented by taking care during repair.

Cover the parts boxes made of plastics with aluminum foil.

Ground the soldering iron.

Put a conductive mat on the work table.

Do not touch the legs of IC or LSI with the fingers directly.

- Voltage and signal line

8	RF	O	RF addition output terminal
9	RF IN	I	RF detection signal input terminal
10	CSBRT	I	Capacitor connection terminal for OFTR (Connected to power supply through capacitor)
11	CEA	I	HPF amplifier capacitor connection input terminal (Connected to power supply through capacitor)
12	BDO	O	Dropout signal output terminal
13	LDON	I	APC control input terminal
14	GND	-	GND
15	/RFDET	O	RF detection signal output terminal
16	PDOWN	O	Reduced voltage detection signal output terminal
17	OFTR	O	Off-track signal output terminal
18	DEFLVL	I	Laser intermittent drive ON/OFF signal input
19	ENV	O	RF envelope signal output terminal
20	GCLT	I	Crystal frame clock
21	EQSW	-	Not used, connected to GND
22	TE N	I	Tracking error amplifier input terminal
23	TE OUT	O	Tracking error amplifier output terminal
24	FE OUT	O	Focus error amplifier output terminal
25	FE N	I	Focus error amplifier input terminal
26	VREF	O	Reference voltage output terminal
27	TBAL	I	Tracking balance signal input terminal
28	FBAL	I	Focus balance signal input terminal

15.3. IC702 (MN662790RSC): Servo Processor/Digital Signal Processor/Digital Filter/ D/A converter

Pin No.	Terminal Name	I/O	Function
1	BCLK	-	Serial bit clock output (Not used, open)
2	LRCK	-	L/R discriminating signal output (Not used, open)
3	SRDATA	-	Serial data signal output (Not used, open)
4	DV _{DD} 1	I	Power supply terminal
5	DV _{SS} 1	-	GND terminal
6	TX	O	Digital audio interface signal output
7	MCLK	I	Command clock signal input
8	MDATA	I	Command data signal input
9	MLD	I	Command load signal input
10	SENSE	-	Sense signal (Not used, open)
11	/FLOCK	-	Optical servo condition (focus) (Not used, open)
12	/TLOCK	-	Optical servo condition (tracking) (Not used, open)
13	BLKCK	O	Sub-code block clock signal output (f=75 Hz)
14	SQCK	I	Sub-code Q resistor clock signal input

Pin No.	Terminal Name	I/O	Function
15	SUBQ	O	Sub-code Q data signal output
16	DMUTE	I	Muting input (Not used, connected to GND)
17	STAT	O	Status signal output
18	/RST	I	Reset signal input (L: reset)
19	SMCK	-	System clock (Not used, open)
20	CSEL	I	Frequency control terminal of crystal oscillator (Connected to GND)
21	TRV	-	Traverse servo control signal output (Not used, open)
22	TVD	O	Traverse drive signal output
23	PC	O	Turntable motor drive signal output (L: ON)
24	ECM	O	Turntable motor drive signal output (Forced mode)
25	ECS	O	Turntable motor drive signal output (Servo error signal)
26	KICK	-	Kick pulse output (Not used, open)
27	TRD	O	Tracking drive signal output
28	FOD	O	Focus drive signal output
29	VREF	I	D/A drive output normal voltage input
30	FBAL	O	Focus balance adj. output
31	TBAL	O	Tracking balance adj. output
32	FE	I	Focus error signal input
33	TE	I	Tracking error signal input
34	RFENV	I	RF envelope signal input
35	VDET	I	Oscillator detect signal input (H: detect)
36	OFT	I	Off track signal input (H: Off track)
37	TRCRS	I	Track cross signal input
38	/RFDET	I	RF detect signal input (L: detect)
39	BDO	I	Dropout detection signal input (H: dropout)
40	LDON	O	Laser power control signal output (H: ON)
41	PLL2	-	PLL loop filter terminal (Not used, open)
42	DSL2	O	DSL loop filter terminal
43	WVEL	-	Double velocity status signal output (Not used, open)
44	ARF	I	RF signal input
45	IREF	I	Reference current input
46	DRF	I	DSL bias terminal
47	DSL2	I/O	DSL loop filter terminal
48	PLL2	I/O	PLL loop filter terminal
49	VCOF	-	VCO loop filter terminal (Not used, connected to GND)
50	AV _{DD} 2	I	Power supply terminal
51	AV _{SS} 2	-	GND terminal
52	EFM	-	EFM signal (Not used, open)
53	PCK	-	PLL extract clock (Not used, open)
54	VCOF2	-	VCO loop filter terminal (Not used, connected to GND)
55	SUBC	-	Sub-code serial output clock (Not used, open)
56	SBCK	-	Sub-code serial input data (Not used, connected to GND)
57	V _{SS}	-	GND terminal
58	X1 IN	I	Crystal oscillator terminal (F=16.9344 MHz)
59	X2 OUT	O	
60	V _{DD}	I	Power supply terminal
61	BYTCK	-	Byte clock signal (Not used, open)
62	/CLDCK	-	Sub-code frame clock signal (Not used, open)
63	FCLK	O	Crystal frame clock
64	IPFLAG	-	Interpolation flag terminal (Not used, open)
65	FLAG	-	Flag terminal (Not used, open)
66	CLVS	-	Turntable servo phase synchro signal (Not used, open)
67	CRC	-	Sub-code CRC check terminal (Not used, open)
68	DEMPH	-	De-emphasis ON signal (Not used, open)
69	RESY	-	Re-synchronizing signal of frame sync. (Not used, open)

Pin No.	Terminal Name	I/O	Function
70	IOSEL	I	I/O select signal input (Connected to V _{DD})
71	/TEST	I	Test terminal (Not used, connected to power supply)
72	AV _{DD} 1	I	Power supply terminal
73	OUTL	O	L ch audio signal output
74	AV _{SS} 1	-	GND terminal
75	OUTR	O	R ch audio signal output
76	RSEL	I	Polarity direction control terminal of RF signal (Not used, connected to power supply)
77	IOV _{DD}	I	Power supply terminal
78	PSEL	I	Test terminal (Connected to GND)
79	MSEL	I	Output frequency select signal input (Connected to GND)
80	SSEL	I	SUBQ output mode select signal input (Not used, connected to V _{DD})

15.4. IC703 (BA5948FPE2): Focus Coil/Tracking Coil/ Traverse Motor/Spindle Motor Drive

Pin No.	Terminal Name	I/O	Function
1	IN2	I	Traverse motor drive signal input
2	PC	-	Not used, connected to GND
3	IN1	I	Spindle motor control signal input (Servo control)
4	PC1	I	Spindle motor control signal input
5 8	NC	-	Not used, open
9	PGND	-	GND
10	PV _{CC} 1	I	Power supply terminal 1
11	D1-	O	Spindle motor driver 1 output terminal (-)
12	D1+	O	Spindle motor driver 1 output terminal (+)
13	D2-	O	Traverse motor driver 2 output terminal (-)
14	D2+	O	Traverse motor driver 2 output terminal (+)
15	D3-	O	Focus coil signal output terminal (-)
16	D3+	O	Focus coil signal output terminal (+)
17	D4-	O	Tracking coil signal output terminal (-)
18	D4+	O	Tracking coil signal output terminal (+)
19	PV _{CC} 2	I	Power supply terminal 2
20	PGND	-	GND
21	NC	-	Not used, connected to V _{CC}
22 24	NC	-	Not used, open
25	V _{CC}	I	Power supply terminal
26	VREF	I	Reference voltage input terminal
27	IN4	I	Tracking drive signal input
28	IN3	I	Focus drive signal input

16 Replacement Parts List

Notes:

- Important safety notice:

Components identified by Δ mark have special characteristics important for safety.

Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used.

When replacing any of components, be sure to use only manufacture's specified parts shown in the parts list.

- The parenthesized indications in Remarks columns specify the area. (Refer to the cover page for the area.)
- The <IA> <IB> <IC> and <ID> marks in Remarks indicate language of instruction manual.

<IA>: German, Italian, French

<IB>: Netherlands, Danish

<IC>: English

<ID>: English, Spanish, Swedish

- The marking [RTL] indicates that Retention Time is Limited for this item. After the discontinuation of this assembly in production, the item will continue to be available for a specific period of time. The retention period of availability is dependent on the type of assembly, and in accordance with the laws governing part and product retention. After the end of this period, the assembly will no longer be available.
- The marking <MAVD> indicates in Remarks columns parts that are supplied by MAVD.
- Other all parts are supplied by MESA.
