LOCATION OF CONTROLS

Note: The unit is provided with the speaker circuit protection fuses at the right and left channels respectively. The fuses are to prevent the power IC from destruction should the speaker terminals be short-circuited. Accordingly, if the unit fails to function upon completion of the speaker connections, check the speaker protection fuses first of all for possible blowing.

■ TO REMOVE THE CABINET

1. Remove the four screws [fig. 1: ① ~ ④] at the left and right sides of the cabinet.
2. Loosen the chassis screw [fig. 1: ⑤] at the right side of the rear panel.
3. Grasp the left and right sides of the cabinet, and lift it upward to separate it from the chassis.
4. To re-install the cabinet, reverse the above steps. Finally, tighten the metal clamp.

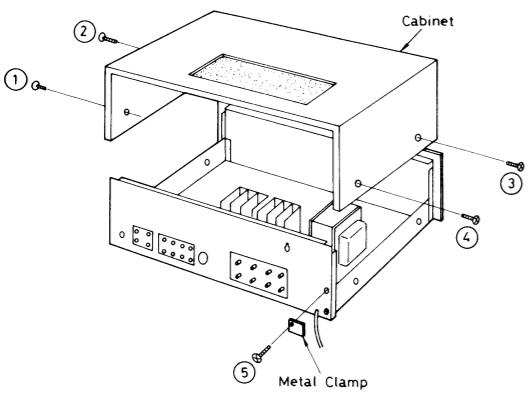

Fig. 1

■ TO REMOVE THE BOTTOM BOARD

1. Remove the cabinet.
2. Remove the five screws [fig. 2: ⑥ ~ ⑩] holding the bottom panel.
3. Because the rear edge of the bottom panel is inserted in the opening between the rear panel and the chassis, the bottom panel can be removed (in the direction shown by the arrow) by slightly lifting its front, as shown in figure 2.

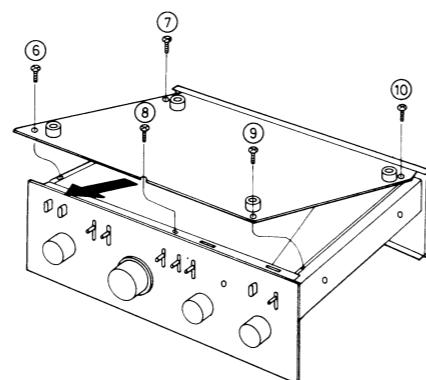

Fig. 2

■ TO REMOVE THE FRONT PANEL

1. Remove the cabinet and bottom board.
2. Pull off the bass, treble, balance and volume control knobs.
3. Remove the nut holding the volume control, and remove the ornament from the panel.
4. Remove the two screws [fig. 3: ⑪ ~ ⑫] which hold the panel.
5. Set all lever-type switches to the lower position, and push all pushbuttons to the pushed-in positions.
6. The 3 projections on the chassis are fitted into the 3 holes on the bottom of the front panel. The front panel can be removed from the chassis, therefore, by tilting it forward (as shown in figure 4), and pushing it downward as shown in figure 5.
7. Because the power indicator printed-circuit board is bonded to the rubber piece on the rear of the front panel, special care should be taken when removing the printed-circuit board so as not to break it.
8. For re-installation, the above steps should be followed in reverse.
